

BOAT RAMP TIPS

BE A COURTEOUS BOATER

POWER BOATERS

Be prepared.

Prepare your boat in the designated make ready lanes.

Experience takes two.

Have one person to back the vehicle and trailer down the ramp, and the other to operate the boat.

Don't block the ramp.

If your vehicle is not at the ramp, wait with your boat away from the ramp.

Use winch lines.

Do not use motor power to load your boat on to the trailer.

PADDLECRAFT

Be prepared.

Unload and load your paddlecraft from a parking spot or an area away from the traffic lanes to the ramp.

Plan your approach.

Launch and retrieve your paddlecraft quickly. If possible, launch away from the ramp or to the side of it.

Paddling with others?

Organize your efforts to minimize time spent near or on the ramp. Unload or load one vehicle at a time.
